## DEALER:

C. Reinhardt represent VOGÉ in five countries. For more information [www.c-reinhardt.com](http://www.c-reinhardt.com). VOGÉ recommends **MOTUL** oil.

# FAR & BEYOND QUALITY.

## TRUSTED EXPERIENCE. NORDIC STRENGTH.

Behind VOGÉ stands C. Reinhardt – a professional distributor with 100 years of experience.

C. Reinhardt represent VOGÉ in five countries and support riders and dealers with a full service organisation, spare-parts security and the professionalism that comes from knowing exactly what it takes to keep you confident on the road.

That's why VOGÉ's "Far & Beyond Quality" is more than a slogan - it's a promise.

Each VOGÉ model is engineered to deliver more than expected: more control, more technology and more quality in every detail. From advanced components to refined riding dynamics, VOGÉ blends modern design with precision engineering.

Across the entire lineup – from agile street bikes to powerful cruiser, sport performer and long-range adventure machines – VOGÉ delivers uncompromising quality and a riding experience designed to exceed expectations. VOGÉ goes further. In technology. In construction. In experience. That is the essence of VOGÉ's promise – Far & Beyond Quality

DESIGNED  
TO TAKE YOU  
FURTHER.

# LIGHT. PRECISE. MODERN.

The VOGÉ R125 is a light and agile street bike that combines modern design with advanced equipment.

Its engine size and low weight make it ideal for both new and experienced riders. With ABS brakes, an upside-down front fork, full LED lighting and a colour LED display, the R125 delivers a riding experience that feels confident, precise and thoroughly modern.

The R125 clearly stands out in the 125 class.

# STRONGER. SHARPER. MORE STREET.

The VOGÉ R625 combines a powerful 581 cc twin-cylinder engine with modern technology and a sharp street-focused design. With 68 hp, traction control with two power modes, ABS, NISSIN brakes, a KYB upside down fork and a TFT screen with connectivity and navigation. On its Pirelli tires the R625 delivers both performance and everyday comfort.

# V-TWIN POWER. PURE CRUISER CHARACTER.

The VOGÉ CU625 blends classic cruiser style with modern technology. Its 578 cc V-twin delivers 61 hp and 61 Nm with a deep, smooth character, while the low 710 mm seat height provides comfort and confident control.

With an innovative air blower to avoid heat from engine, traction control, ABS, full LED lighting, front camera, USB power outlet and a cool looking colour LCD display, the CU625 stands out through both function and design – delivering a riding experience full of character and personality.

# PURE POWER. PURE SPORT.

The VOGÉ RR660S is built for riders who want pure sporting performance that feels light, precise and fully controllable. Its 663 cc liquid-cooled four-cylinder engine delivers 95 hp at 11,500 rpm and 64 Nm at 10,000 rpm, providing a powerful and direct response with plenty of reserve – both on the road and on the track.

With a weight of 215 kg, a sporty seat height of 810 mm and an aggressive, aerodynamic design, the RR660S combines power, precision and stability at a level that goes far beyond the standard of its class.

DETAIL.

ADVENTURE | 300RALLY

# LIGHT. RAW. READY FOR THE TERRAIN.

The VOGÉ 300RALLY is built for adventure-minded riders who want a light and agile off-road machine with plenty of control in loose terrain. Its 292 cc liquid-cooled single-cylinder engine delivers 29 hp and 25 Nm – enough power for technical trails, gravel roads and everyday riding alike. With a weight of just 158 kg and an adventure-ready seat height of 850 mm, the 300RALLY feels light, responsive and ready for challenges.

The 300RALLY is equipped with Gravel Mode, allowing rear ABS to be deactivated for improved control off-road. The upside-down front fork, engine guards, hand guards LED tail light and indicators provide both functionality and durability. A digital display ensures clear information in all lighting conditions.

The 300RALLY delivers a genuine adventure riding experience.

# BUILT FOR TERRAIN AND TOURING.

The VOGÉ DS525X is a modern adventure machine built for both asphalt and gravel. Its light weight 494 cc twin-cylinder engine delivers smooth, usable power, while adjustable suspension, NISSIN brakes, traction control with two riding modes and ABS ensure confident control in all conditions.

With adaptive LED cornering fog lights, an LCD display with connectivity, navigation and TPMS sensor and full LED lighting, the level of technology rivals that of far more expensive models. Practical details such as hand guards, an adjustable windscreen and a centre stand make the DS525X ready for any journey – long or short.

# BUILT FOR GREAT ADVENTURES.

The VOGÉ DS625X is a powerful adventure machine built for long distances, demanding terrain and confident control on all surfaces. Its 581 cc twin-cylinder engine delivers 64 hp and strong low-end torque, while adjustable suspension, a slipper clutch, traction control with two riding modes and NISSIN brakes provide stability and confidence — whatever the route.

Technology is at a premium level, featuring adaptive LED cornering fog lights, full LED lighting, an LCD display with connectivity, navigation and TPMS sensor, front camera, backlit switches and an adjustable windscreen. With hand guards, engine guards, a centre stand and a comfortable riding position, the DS625X is designed for long days in the saddle and adventures without limits.

**Standard equipment:** TCS with 2 power modes, ABS brakes, slipper clutch, upside-down front fork, adjustable suspension, full LED lights and indicators, adaptive LED cornering and fog lights, LCD display with connectivity, navigation and TPMS sensor, backlit buttons, front camera, engine guards, hand guards, adjustable windscreen, center stand, and NISSIN brakes and Tubeless Metzeler tires.

ADVENTURE | DS800RALLY

BUILT TO BE CHALLENGED.

The powerful 798 cc twin-cylinder engine delivers 94 hp and strong torque, providing confident stability on long stretches and plenty of reserve in demanding technical terrain. Fully adjustable KYB suspension with steering damper ensures precise control – even when surface conditions change – while the large 24-litre fuel tank offers the range required for serious adventure riding.

A 7" TFT screen with advanced functions, front camera, full LED lighting, NISSIN radial-mounted front brakes and a slipper clutch support a riding experience that combines raw capability with modern technology. Reinforced engine guards, hand guards, an adjustable windscreen and a centre stand make it ready for both demanding off-road use and long-distance expeditions.

# NEXT-LEVEL ADVENTURE.

Powered by a strong 895 cc twin-cylinder engine delivering 94 hp and 95 Nm, the DS900X offers serious performance on both asphalt and gravel.

The advanced setup with four riding modes, Bosch cornering ABS, Brembo brakes and fully adjustable KYB suspension ensures precise control in all situations — regardless of terrain or pace.

Comfort and safety are further enhanced with a quickshifter (up/down), cruise control, heated seat/ grips and keyless GO. A rear-facing radar system with blind-spot warning increases awareness in traffic, while adaptive LED lighting, hand guards, engine guards and an adjustable windscreen ensure full functionality on long-distance journeys.

A 7" TFT screen with navigation via the VOGÉ app, front camera and centre stand complete the package – an adventure motorcycle built for wide horizons and uncompromising control.
